*We foster  
Earth care in  
congregations.*

Earth's ecological crisis is one of the biggest issues of our time. Congregations of all faiths can play an important role in meeting the challenge. For who better to care

for creation than those who love its Creator?

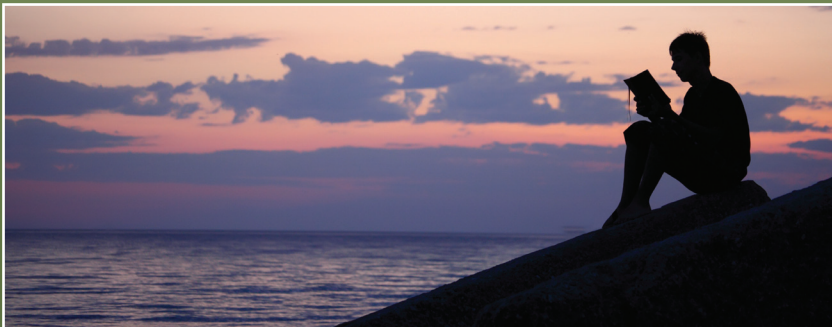

Sustainable Sanctuary helps Kansas City area congregations become a powerful force for the protection of the planet. It doesn't matter if your congregation is seasoned in Earth care or just getting started. If you love the planet and God, join us in rising to this sacred opportunity.

*You have a lot to offer. So do we.*

Getting your congregation up to speed on environmental stewardship may seem a sizable challenge; it's a question of having the right strategies, education, and tools in place. That's where we come in.

We offer education in the form of workshops, trainings, classes and retreats. Just as important, we offer a wider network of support and individual assistance as needed.

Collaborate with us and learn how to affect positive change on behalf of the planet.

**Sustainable Sanctuary will assist you to:**

*Start a Green Team.*

A Green Team is a group that gives leadership and direction to your congregation's environmental efforts. We can help you build an effective Green Team, or strengthen your existing one.

*Make your facility sustainable.*

Greening your facility is one of the surest ways to make an immediate impact. You can protect the Earth, reduce your energy costs, and motivate members to be green at home—all at the same time.

*Preach and teach Earth care.*

We believe that Earth care is a sacred responsibility. So, we provide resources and educational programs that assist you in promoting the spiritual and religious basis for creation care. We want all people of faith to see the connection between protecting the Earth, justice, and service to God.
